Source IP	192.168.0.1
Target IP	192.168.0.108
Signature	PORT_SCAN
Protocol	TCP

7. Impact Analysis

The scan is a reconnaissance step; no payload delivery or data exfiltration detected. However, the presence of open SMB/RPC services could be exploited in subsequent stages, increasing the risk of lateral movement or privilege escalation.

9. SOC Conclusion

The activity represents a high■severity reconnaissance attempt. While no compromise has occurred, the adversary is actively probing for exploitable services. Immediate containment actions and continuous monitoring are essential to prevent potential exploitation of the identified open services.
